

HOW TO GET AN

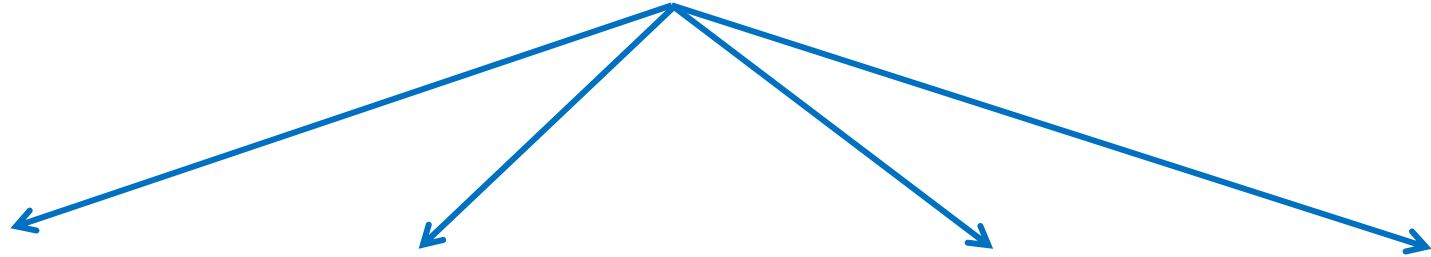

ADV GRANT?

Beyond the first decade

- ERC aims to sponsor innovative research that would not be possible without their support.
 - This excludes more of the same research
- ERC sponsors excellent research.
 - Top CV is rather helpful
- Applications are peer reviewed.
 - 7-10 extensive reviews. Balancing act between ambition and reality
 - Should be very well written (with nice figures)
- Define an interesting and exciting topic that is not too far from your main line of research.

Consideration of a topic

The Neefix laboratories

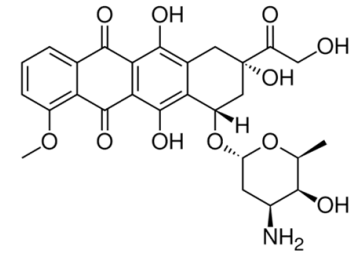

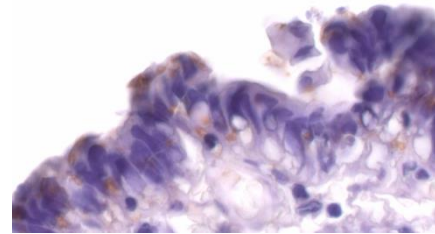

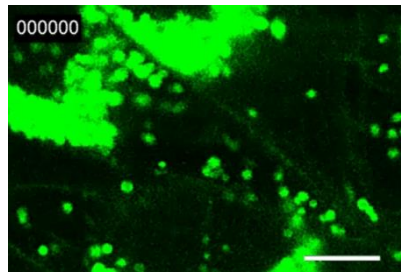

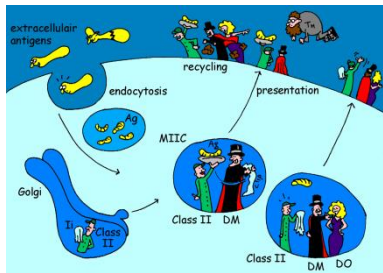

MHC class I and II

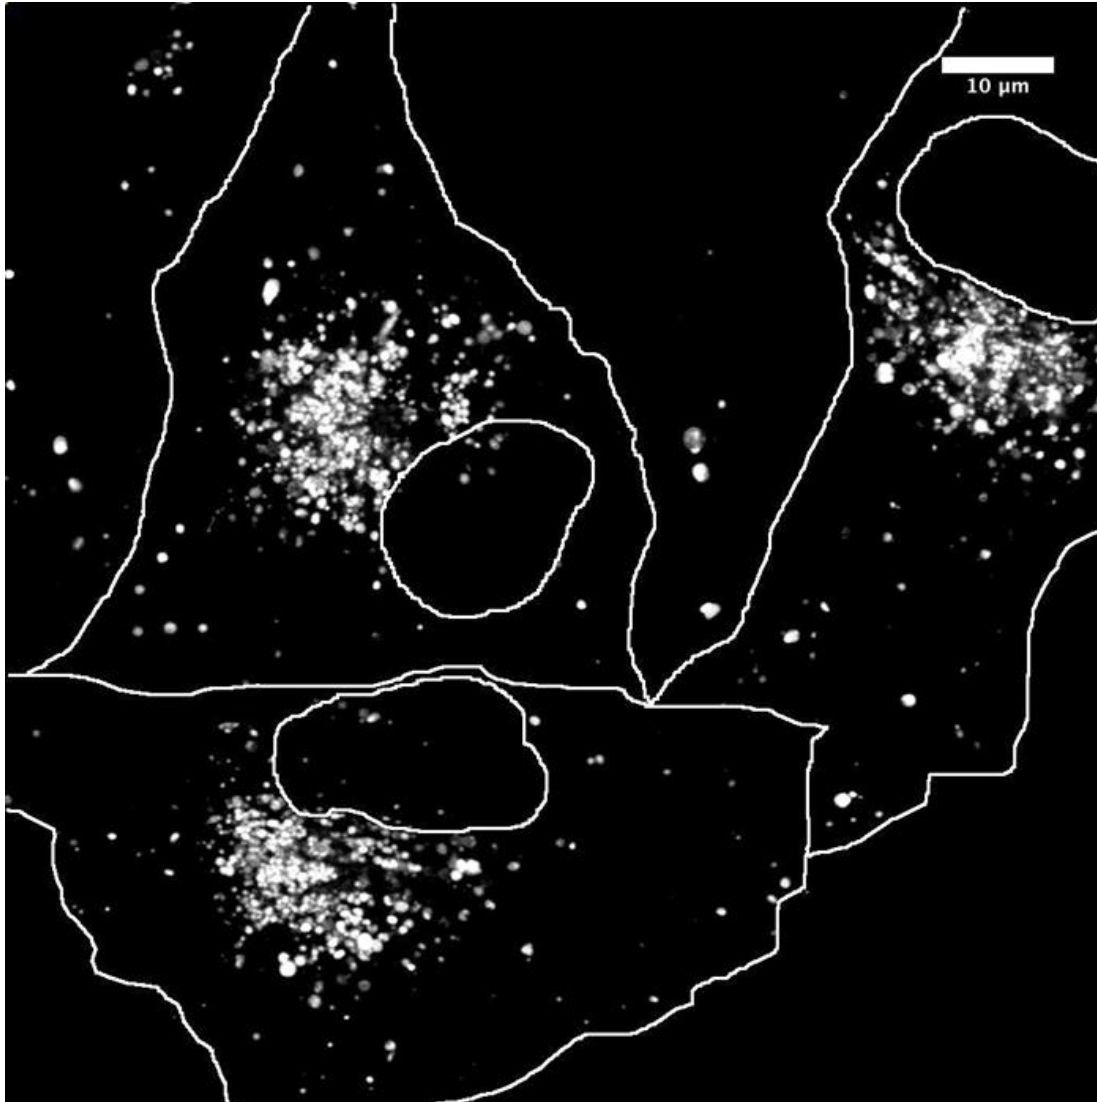

Endosomal transport

Bacterial induction cancer

Old cancer drugs

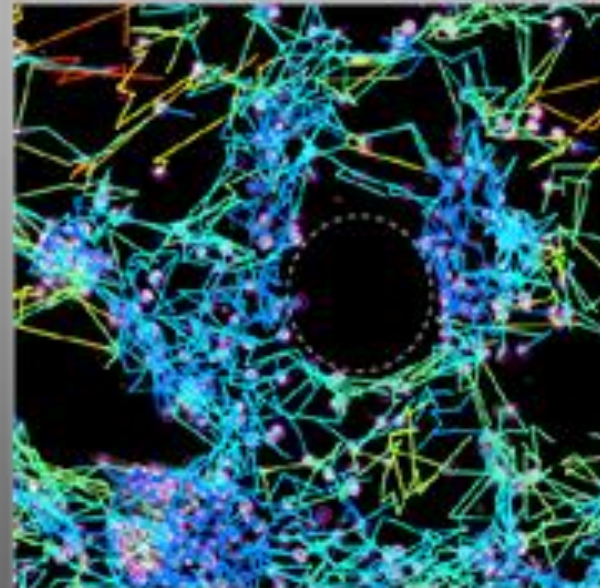

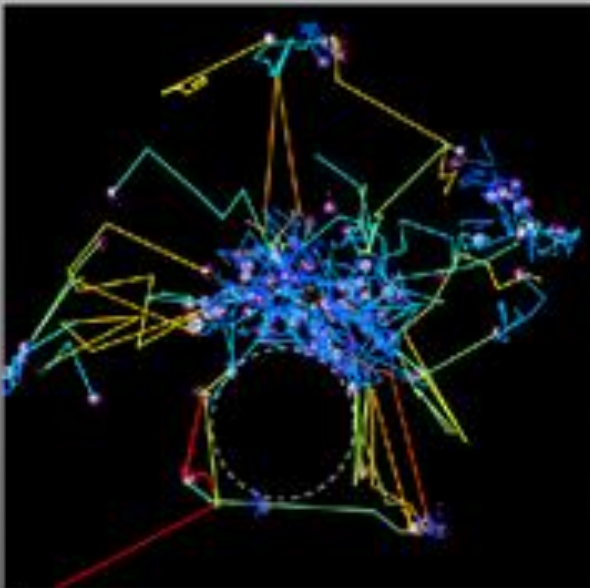

Define a cool question

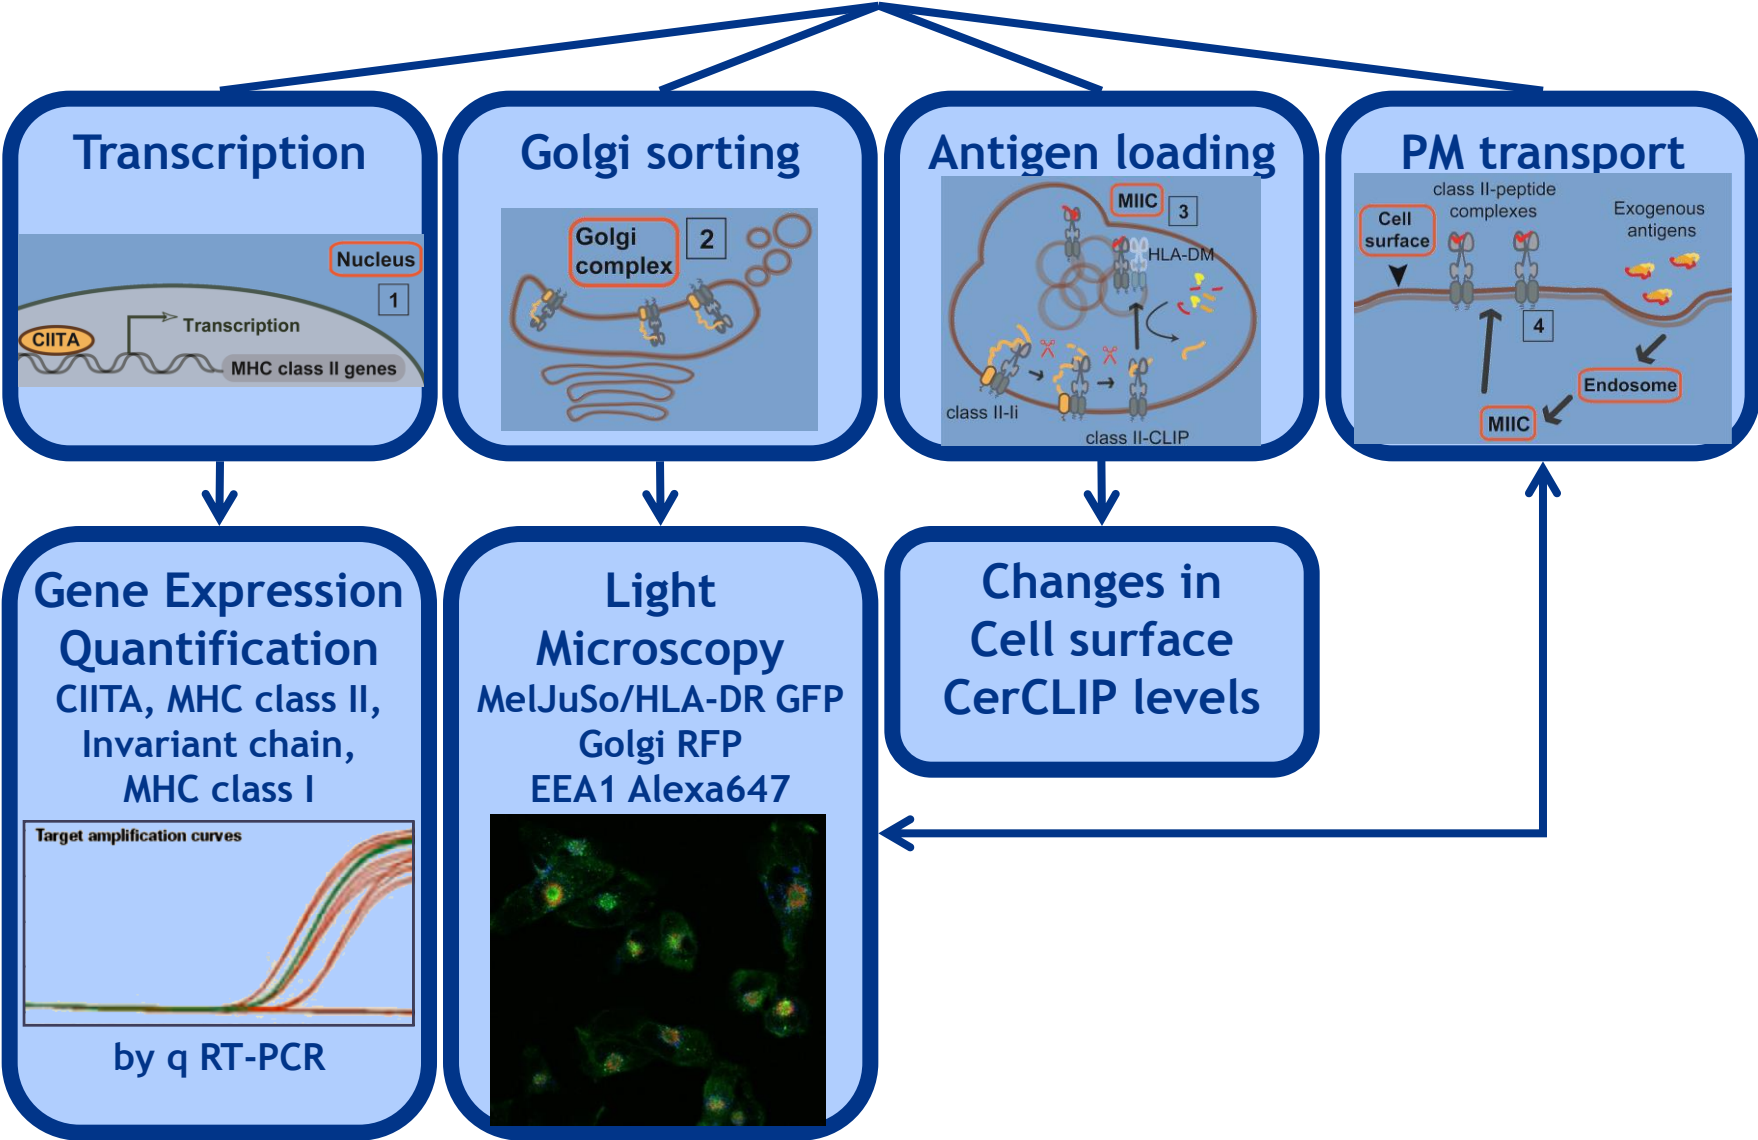

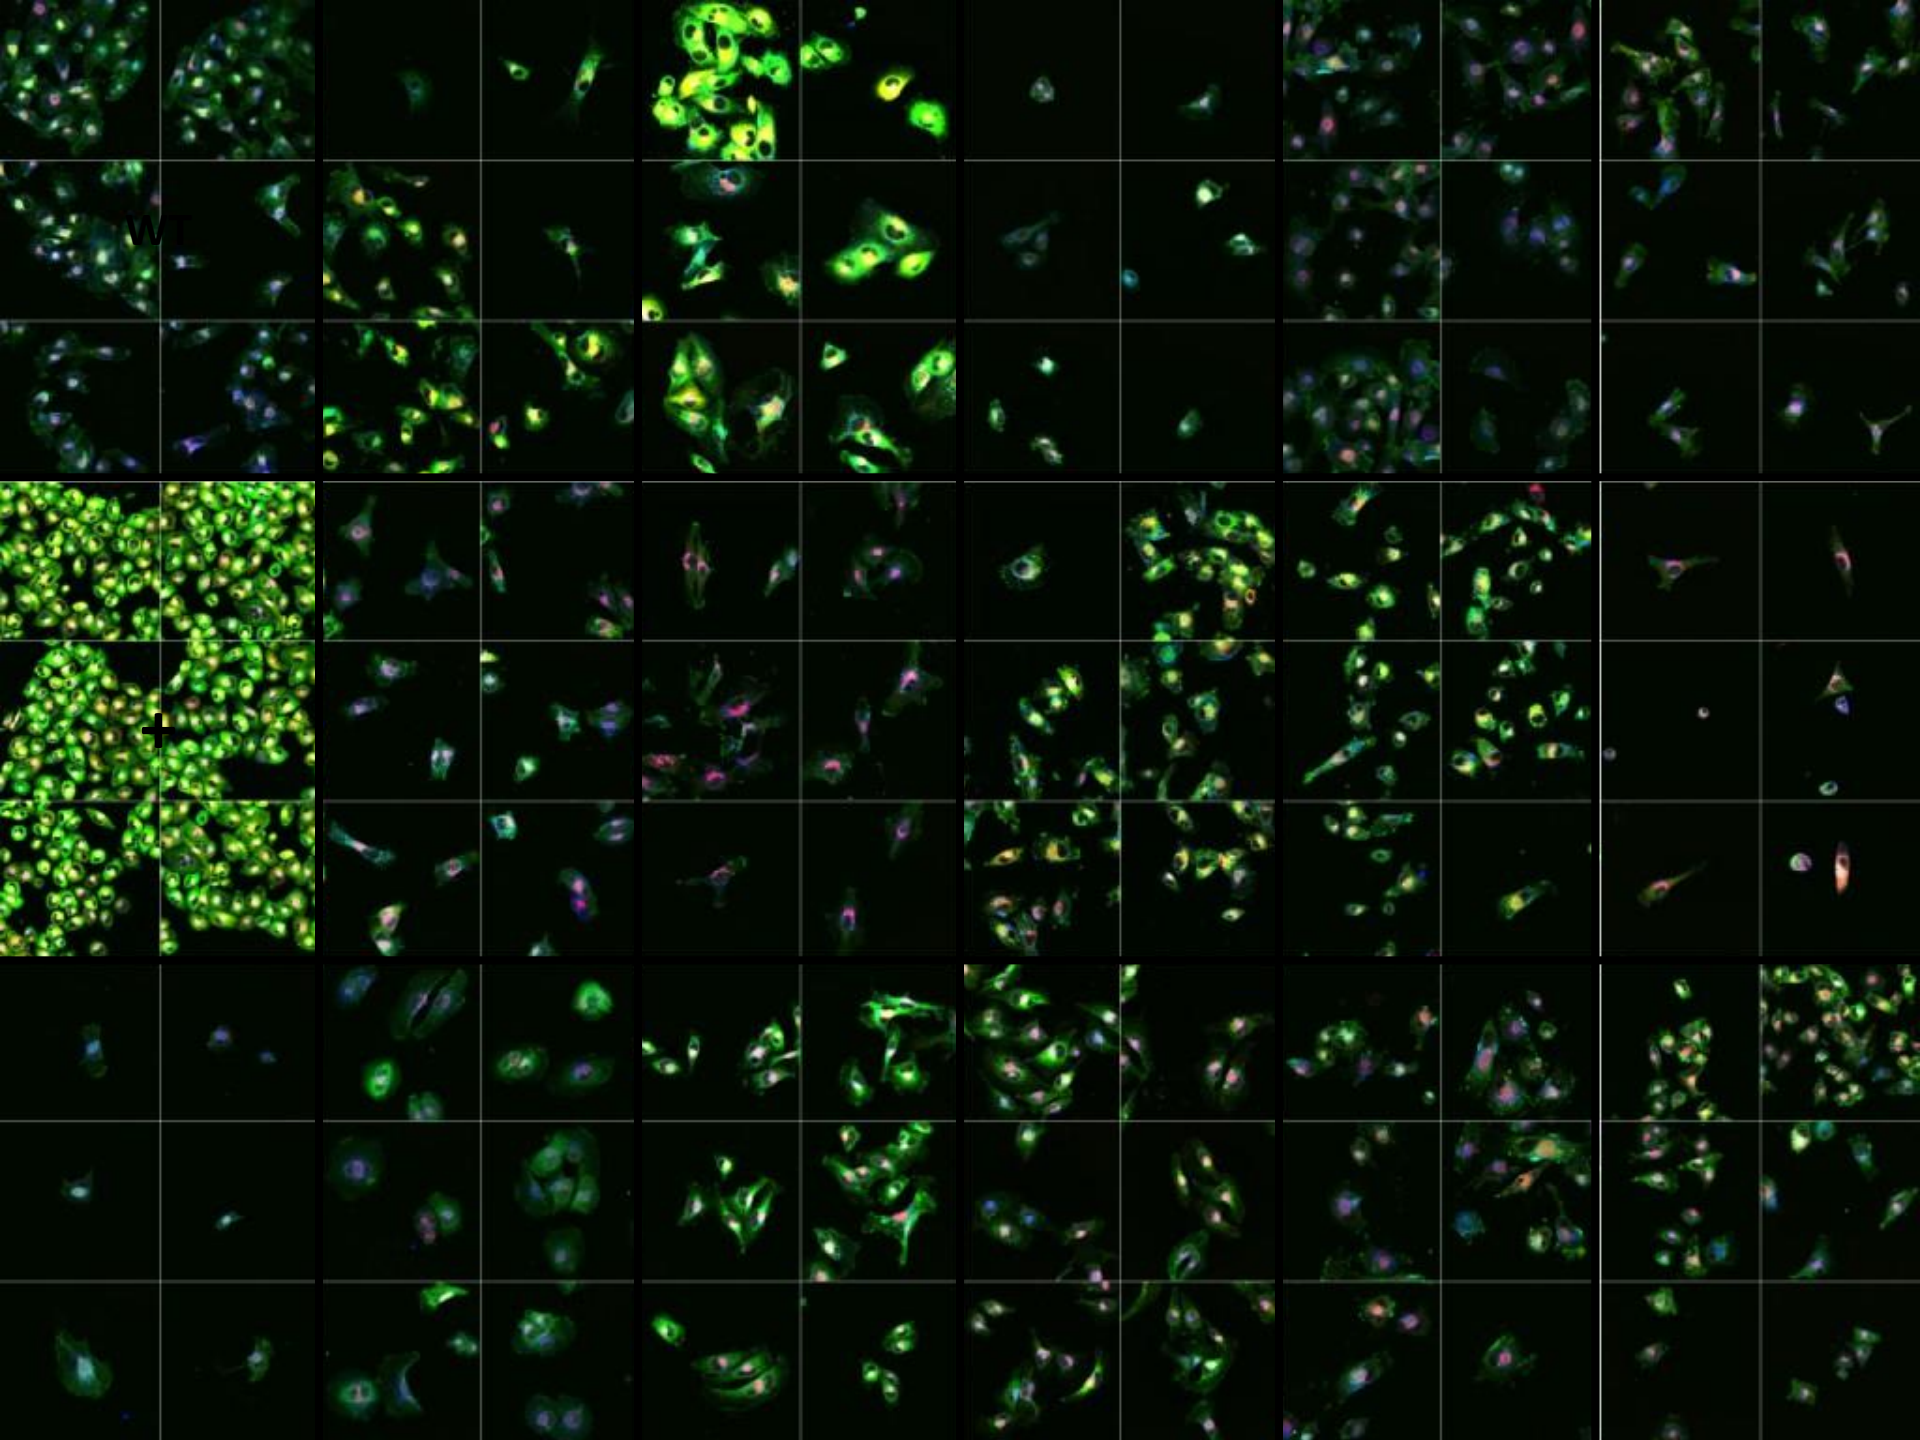

Define a cool question

Why is organization like this and ... not like this?

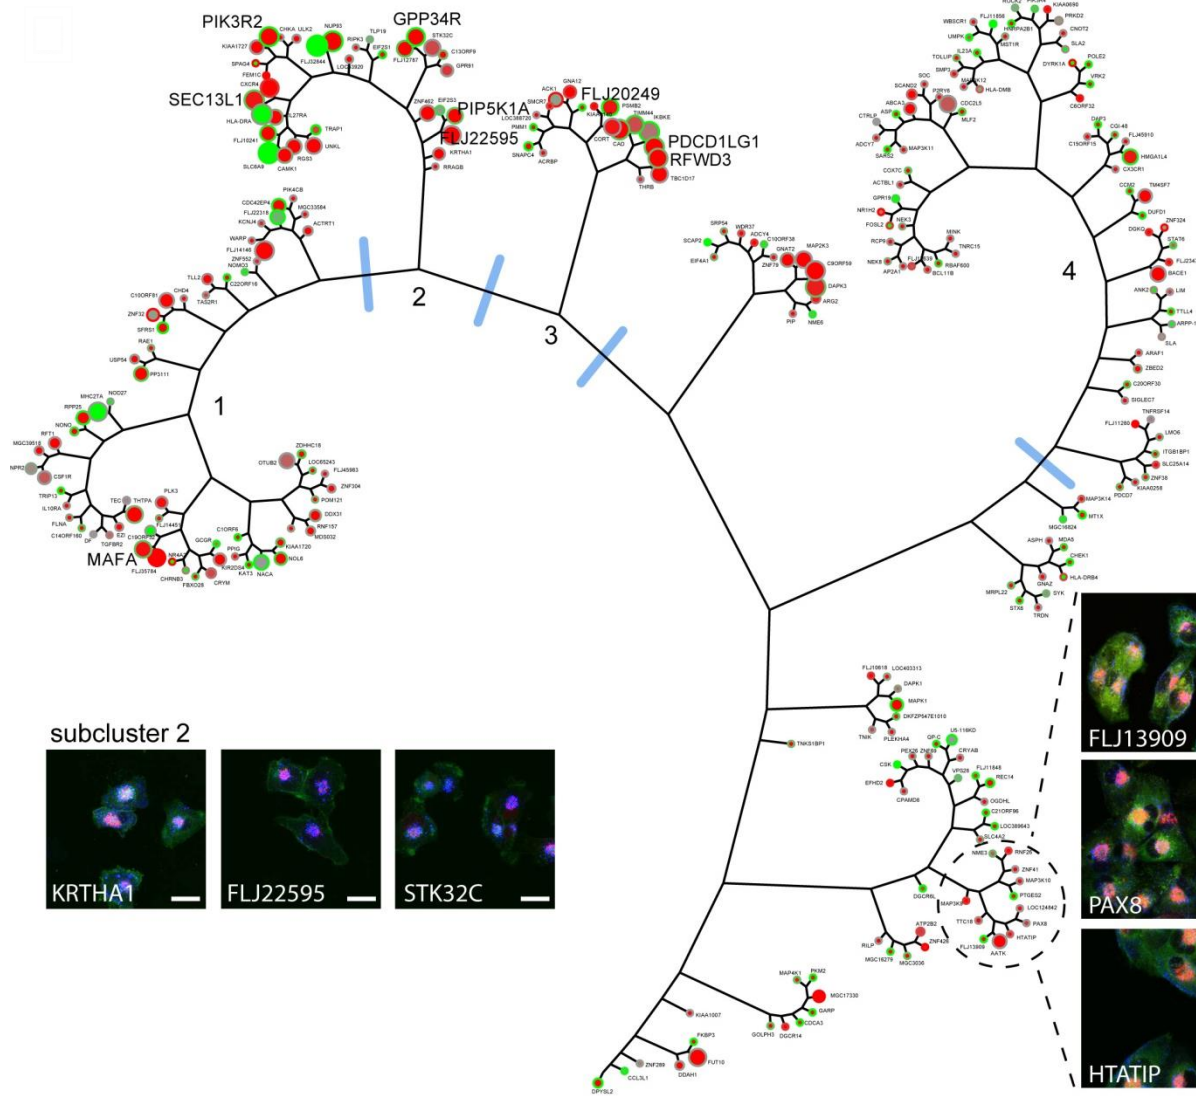

Unique data set: the MHC class II pathway

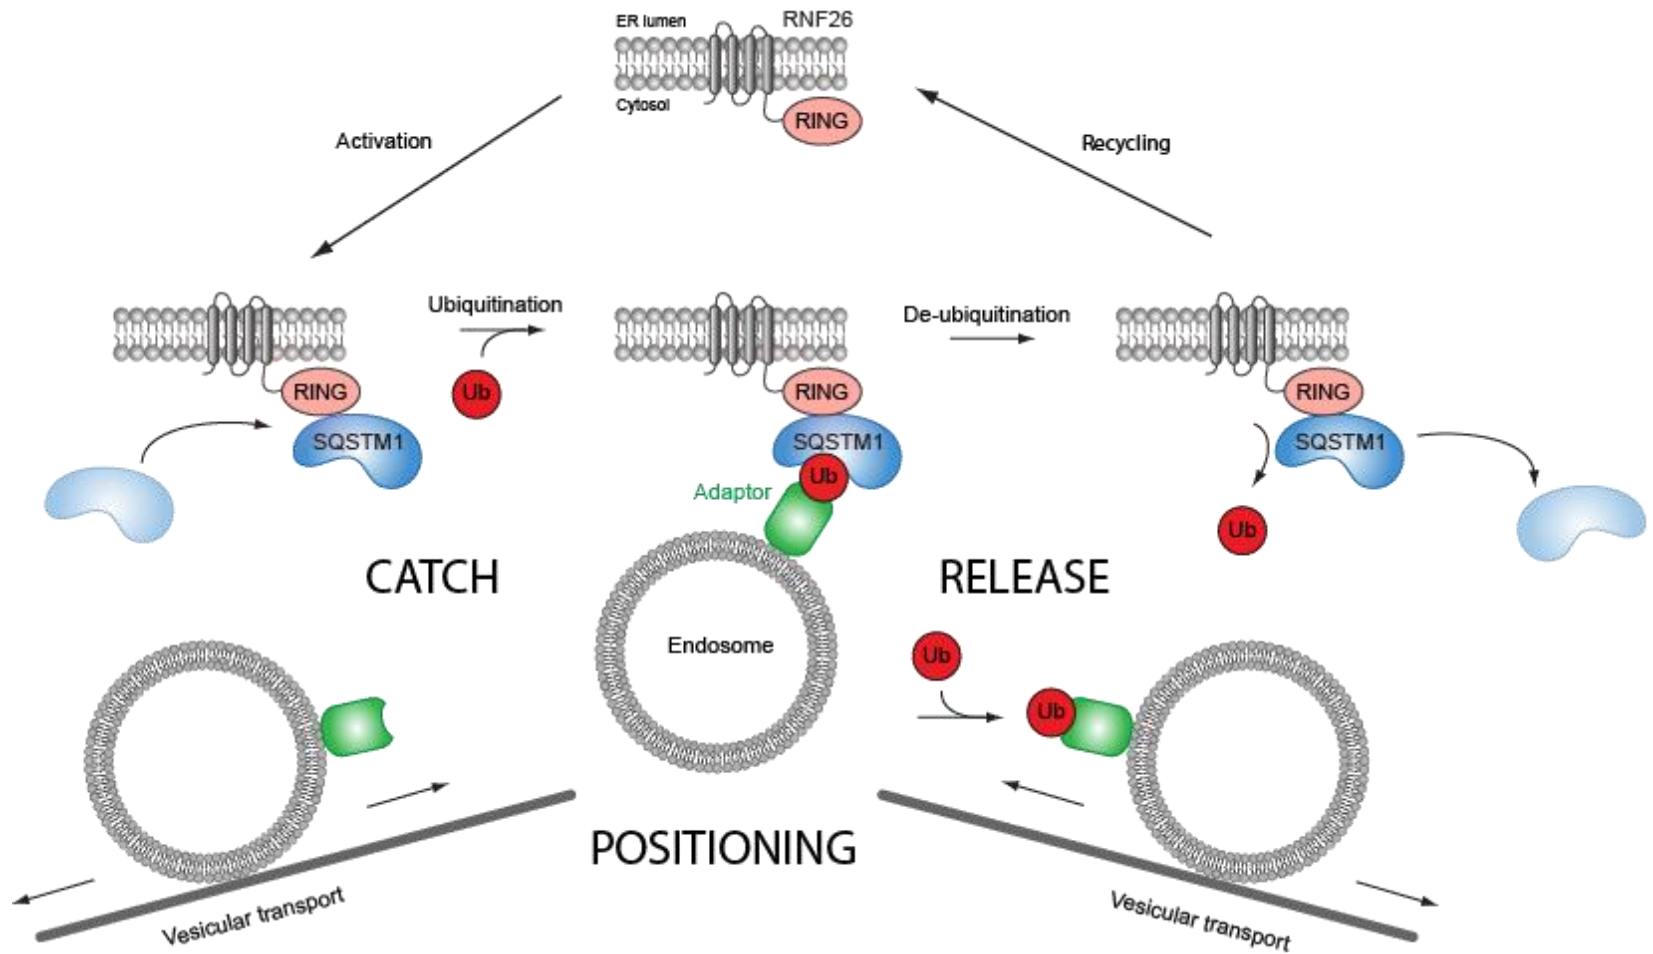

Have unique data integration set

Have breakthrough aims

Remaining points

- ERC in principle supports fundamental curiosity driven science. Application is possible and they have a special program for this (PoC). I have support for a purely fundamental program .
- ERC is important for career development. Considered to be a measure of esteem with high quality selection.
